

## Self-Compensating Wrap Roll Replacements

### Features and Benefits:

Automatically compensates for loose edges and loosely wound rolls.

No operator input required.

Easy to install on virtually all preheaters/preconditioners.

Ensures even heat distribution to paper on preheater drums.

Contributes to warp reduction.

Negates effect of backlash and non-parallel worn wrap arms.

Eliminates many bonding problems associated with uneven tension in the combined board entering the double facer.

Does not steer the web off machine center.
