

**Thermo Bar Heating
Section Conversions
Belted or Beltless**

Simply the Best!

Why Thermo Bars?

- Negates the effects of chest deflection.**
- Increases the use of available heat.**
- Equalizes and balances board moisture content and temperature.**
- Improves board quality by totally eliminating crush and decreasing warp**
- Improves productivity at corrugator and converting operations due to improved board quality.**
- Minimal operator adjustments required.**
- Instantaneous temperature control with Profero control options.**
- Maintenance and machine downtime associated with rollers is eliminated.**

Investment into the Future:

Thermo Bars are available in belted or beltless configurations. Start with a Belted Thermo Bar conversion now and then convert to beltless at a later date. Existing Thermo Bar installations can be converted to beltless for a minimal cost.
